

MARIA SKŁODOWSKA-CURIE KEPT THIS JOURNAL WITH NOTES ON HER EXPERIMENTS WITH RADIOACTIVE SUBSTANCES IN THE YEARS 1899-1902. THE JOURNAL HAS BEEN PRESERVED IN EXCELLENT CONDITION UNTIL TODAY.

AS WE LEARN, HER JOURNAL IS STILL HIGHLY RADIOACTIVE. SO FAR ONE NEEDS A PROTECTIVE SUIT TO BE ABLE TO SAFELY READ IT. ALL HER NOTES ARE KEPT IN LEAD BOXES.

IT IS ESTIMATED MARIA'S SCIENTIFIC JOURNAL WILL REMAIN RADIOACTIVE FOR ANOTHER 1500 YEARS.

MARIA SKŁODOWSKA WAS AWARDED HER FIRST NOBEL PRIZE IN PHYSICS FOR RESEARCH ON RADIOACTIVITY IN 1903. IN 1911, SHE GOT ANOTHER NOBEL PRIZE IN CHEMISTRY FOR THE DISCOVERY OF RADIUM AND POLONIUM AND HER STUDIES OF THE PROPERTIES OF RADIOACTIVE ELEMENTS. WHAT FOLLOWS IS A PHOTO OF THE JOURNAL.

MARIA SKŁODOWSKA-CURIE WAS A POLISH SCIENTIST. SHE STARTED ALL HER SPEECHES WITH "I WAS BORN IN WARSAW..." SHE IS THE ONLY WOMAN SO FAR TO GET A DOUBLE NOBEL PRIZE (OUT OF FOUR NOBELISTS THAT GOT MORE THAN ONE) AND THE ONLY PERSON TO GET A NOBEL PRIZE IN DIFFERENT FIELDS.

# THE JOURNAL OF MARIA SKŁODOWSKA
